

Summary

Final-Year Computer Science student at Universitas Negeri Semarang with 1+ years of experience in software engineering. Passionate about software development, scalable systems, and AI-powered applications. Interested in building technology-driven solutions to solve real-world problems.

Experiences

Haloop.AI | Fullstack Developer

2025 - 2026

Singapore

- Developed and maintained customer-facing web applications using Next.js.
- Built AI agent workflows using LangGraph and TypeScript for the Haloop AI Contact Assistant.
- Designed and managed PostgreSQL database structures through Supabase, ensuring efficient data organization and retrieval.
- Designed, developed, and maintained scalable backend services and RESTful APIs for the Contact Management platform.
- Integrated backend systems with AI-driven features to support automation and customer interaction workflows.
- Implemented file management features using Cloudflare R2, including upload, storage, and access handling for application assets.
- Executed end-to-end testing scenarios to verify product quality and application reliability.
- Documented APIs, services, and workflows to improve maintainability and facilitate knowledge sharing across the team.

Rapier Technology | Backend Intern

January 2026 - May 2026

- Analyzed business process flows based on documentation and flowcharts provided by the Business Analyst team.
- Developed RESTful API endpoints to support core business functionalities.
- Designed database schemas and managed relational data using MySQL and PostgreSQL
- Integrated AWS S3 for scalable file storage and asset management.
- Enhanced application performance through Redis-based caching strategies.
- Collaborated with frontend developers and the design team to ensure accurate implementation of application requirements and user workflows.

HIMA ILKOM | Media And Creative

2023 - 2024

- Designed posters, flyers, and visual materials to support organizational programs and events
- Manage visual content and to increase organizational engagement on social media, especially Instagram of HIMA ILKOM.

Education

Universitas Negeri Semarang

August 2023 - Present

Computer Science - GPA 3.73

Skills

Front-End Development
RESTful API
Langraph AI Workflow

Tech/Tools

Cursor
Git/Github
Postman
Sentry

Languages

Bahasa Indonesia
English
